PROFESSIONAL SUMMARY

Final-year Computer Science (AI & ML) student with a strong foundation in React and Next.js for frontend development, and FastAPI and Node.js for backend development. Skilled in applying machine learning and data science concepts to real-world problems, with a keen interest in learning, contributing to, and growing through hands-on software development projects.

EDUCATION

Rajalakshmi Institute of Technology

B.E. Computer Science and Engineering (AI & ML), CGPA: 8.67

Velammal Matriculation and Higher Secondary School

Higher Secondary Education, Cut-off: 196.5/200

Chennai, India

September 2023 – Present

Chennai, India

July 2022 – April 2023

TECHNICAL SKILLS

Languages: Python, C, Java, JavaScript, SQL

Developer Tools: GitHub, VS Code, Postman, MongoDB Compass, GitHub Copilot

Frameworks/Libraries: React, Node.js, Next.js, Flask, FastAPI

WORK EXPERIENCE

Web Developer at Rajalakshmi HealthCity | *HTML, CSS, JavaScript*

June 2025 - August 2025

- Contributed to a 20+ page hospital and medical college website using vanilla HTML, CSS, and JavaScript, eliminating backend infrastructure to reduce page load times and server storage costs.
- Improved website performance by applying lossless image compression and lazy loading, reducing image size by 95% load times across all pages.

PROJECTS

SPARK – Smart Planner And Roadmap Kit | *Next.js, FastAPI*

July 2026

- Designed a community platform for sharing checklists and roadmaps with **2-tier role-based access control** (viewer, creator), version history, and forking.
- Delivered an analytics dashboard tracking **real-time task completion**, plus a creator dashboard with an XP-based reward system to drive engagement.

NeuroScreen | *Next.js, FastAPI, PostgreSQL, BetterAuth*

January 2026

- Developed a **full-stack** autism screening platform implementing the clinically validated AQ-10 assessment alongside an **ML-based** risk prediction model.
- Architected a **FastAPI backend** exposed via **REST API** routes, enabling real-time predictions on the frontend.

PredictMyHome – House Price Prediction Website | *Flask, scikit-learn, Render*

October 2025

- Trained a **Random Forest Regressor** on encoded housing features, improving price prediction accuracy over baseline linear models.
- Deployed an **interactive Flask web application** on **Render** for real-time, on-demand price predictions.

ACHIEVEMENTS

- Hackathon Winner** at four events: BNY Design Jam (**IIT Madras**), AIWARS (**SRM Easwari Engineering College**), Tekhora'26 (**Madras Institute of Technology**), and Origin'26 (**SIMATS**).
- Hackathon Runner** at Vyuathon'26 (**Madras Institute of Technology**).
- Shortlisted and invited to **India Innovates 2026**, National-level innovation summit at Bharat Mandapam, New Delhi.
- Solved over **360** problems on **LeetCode** across 200 active days, earning the **100 Days Badge 2026**.

CERTIFICATIONS

- Deloitte** Data Analytics Job Simulation, **Forge**
- Introduction to MongoDB, **MongoDB**
- Introduction to **Git**, DataCamp
